

Straight Crack Pipe

One-Use Smoking Kits are presented in two different formats. One contains a straight pipe while the second kit contains a curved pipe

The key feature of both kits is that they are provided in a convenient and discrete plastic carry case to protect the glass pipe when it is not in use - thereby prolonging the use.

The pipes can be re-used by the same person but must never be shared.

If you need to share your pipe, always use a new mouthpiece.

Straight pyrex heat-resistant pipe
10cm long
10mm diameter
Provided with stainless steel wire plug
to hold rock in place.
Silicone (non-latex) mouthpiece
provided to protect lips

Curved pyrex heat-resistant pipe

10cm long

15mm diameter

Provided with stainless steel wire mesh to hold rock in place.

Silicone (non-latex) mouthpiece provided to protect lips
